

New BabyScatt Emergency Evacuation Device

SEBASTOPOL, CA, January 2, 2009 – It was announced today that Pisces Productions has entered into a business partnership with Creative Safety Solutions, Inc. to manufacture the BabyScatt. The BabyScatt is the newest evacuation device offered by CSS, specialists in emergency evacuation devices. This unique product is designed to evacuate up to six babies at a time, up or down stairs.

“The BabyScatt is the easiest and safest way to evacuate up to six infants at once. In most cases the device can be operated by just one person,” Says Royce Brooks, inventor of the BabyScatt and Owner of CSS. “I’ve been designing emergency evacuation devices for decades but I’m especially gratified to see this unique product finally become a reality. The BabyScatt is ideal for hospitals, day care centers and nurseries. We’re anticipating a huge demand.”

The BabyScatt is available with six pockets for infants or two to four pockets for toddlers. In most cases the device can be operated by just one person and it easily negotiates stairs, landings and rough terrain.

It is strength-tested and made from lightweight materials. It’s also collapsable for easy storage.

“We proud of our partnership with CSS,” says Nancy Rosenblum, Owner of the Pisces Productions, manufacturer of the BabyScatt.

“We realize the incredible life-saving potential of this device. I hope every medical facility and childcare center will be introducing the BabySCatt into their evacuation procedures. It just makes perfect sense.”

About Pisces Productions Pisces Productions is based in Sebastopol, California. The company has been producing high quality products since 1977. For further information about Pisces Productions please phone 800-822-5333 or visit their website www.piscespro.com
